

Write the path from node A to node Q A, E, J, Q

Write the path from node Q to node A

Pre Order: root left right

In Order: left root right

Post Order: left right root

Pre Order :

In Order :

Post Order :

For example 1: Construct a binary tree by using pre-order and in-order sequences given below. Write the output in post-order traversal.

In-order: 1, 6, 8, 7

Pre-order: 1, 6, 7, 8

Explanation: The tree will look like this:

Output is : ?

For example 2:

Create an Expression Tree from the following infix Expression.

$(a+(b*c))+(((d*e)+f)*g)$
